1. Background

The implementation of BCMS is to ensure Ecobank Rwanda can deliver products and services during and after disruptive events. While determining the scope of BCMS, Ecobank Rwanda has considered external and internal issues as relevant to business continuity.

2. Purpose of BCM

The purpose of business continuity management is to identify potential threats to an organization and the impacts to business operations those threats might cause, and to provide a framework for building organizational resilience with the capability of an effective response.

3. Reference Documents

BS EN ISO 22301:2019 – Business Continuity Management Systems – Requirements

4. Requirements

SN	Interested Parties	BCMS Requirements
1	Regulator	Service design to ensure all customer requirements are dealt with an agreed time.
2	Employees	Health and safety requirements. Safe and secure work environment. Timely compensation.
3	Investors/Board	Investment protection, unavailability impacts global branding

5. Applicability of the Business Continuity Management System

The BCMS includes the following parts of the Ecobank Rwanda Plc:

	Department	Justification
1	Legal department	Legal, regulatory, and other requirements advisory services.
2	Finance department	Financial support for all bank operations including Business Continuity.

3	Ops &IT department	Critical department for processing local & international payments, exports, and LC; Protect the banks' proceeds by checks and balances on the transactions processed by all other departments; Critical processing of all local payments & provides the core on to which service and products are provided. Ecobank is driving digitalisation of banking services and IT is pivotal in the delivery ecosystem.
4	Compliance department	Ensures compliance with all legal, regulatory and any other requirements. Interface between the bank and regulating bodies on compliance issues
5	Internal Audit department	Internal performance and assessment of the Business continuity management initiatives.
6	Internal Control department	Internal monitoring for operational challenges resulting in losses. BCM need to protect against losses resulting from operation challenges.
7	Risk Management department	Monitors all the banks risks and forms an interface between regulators and the bank in managing all types of risk where BCM is established to reduce some of the operation risks.
8	Human Resources department	Provision of the resources to support the business including Business Continuity personnel and training and competence requirements. Responsible all staff welfare.
9	Corporate Banking department	Core provision of Banking services. Business Continuity need to protect the services and products for this department.
10	Consumer Banking department	Core provision of Banking services. Business Continuity need to protect the services and products for this department.
11	Commercial Banking department	Core provision of Banking services. Business Continuity need to protect the services and products for this department.

12	Treasury department	Core provision of Banking services. Business Continuity need to protect the services and products for this department.
13	Customer Experience	Provide a critical role in building trust, driving loyalty, enhancing digital engagement, and ensuring regulatory compliance by delivering seamless, personalized interactions that strengthen the institution's reputation and performance.
14	Transaction Services Group (TSG) department	Core provision of Banking services. Business Continuity need to protect the services and products for this department.
15	Credit department	Monitors all the bank credit risks and forms an interface between regulators and the bank in managing all types of risk where BCM is established to reduce some of the operation risks.
16	EBS	Provides procurement and physical security. Business Continuity need to protect the services and products for this department.

8. Locations

Location/Address	Key Activities
KN 3 AV 4 P.O Box 3268 Kigali- Rwanda Head office Ecobank Building Main-Branch	Primary site Business as Usual (BAU)
Kicukiro- KK15 Rd Ecobank Archive Business Recovery site	Business Continuity Site - following an interruption or disaster, leading to increased operational stability and better enabling business to survive and ultimately thrive.

9. Out of Scope with justification

The exclusions also extend to other Ecobank Rwanda Plc physical business locations and other non-critical outsourced services and supply chain not listed within the scope. The following areas are specifically excluded from the scope of the BCMS:

- Ecobank branches, regional offices without critical processes
- Internal Communication tools: Non- essential platforms like informal chat app or employee newsletters

- Office tools: application for managing office assets or employee time management systems
Justification: These tools enhance operational convenience but do not directly impact mission-critical operations or customer-facing services. Any interruption in these areas do not pose a significant risk to business continuity and can be restored after critical services are stabilized.
- Noncritical business services, processes and activities as specified by the Business Impact Analysis and Risk Assessment and applicable Legal and Regulatory requirements.
- Other Ecobank physical business locations and other non-critical outsourced services not listed within the scope above.
